WORK EXPERIENCE

Apr 2019-Present	Computer Vision Researcher at HUAWEI, Canada Working on interesting computer vision and machine learning challenges.
Nov 2018-Mar 2019	Lead Computer Vision Scientist at FLEX A.I., Canada Fitness application: built in a short time a challenging computer vision feature My Team: Me (lead) and a Machine Learning Engineer I proposed an innovative problem formulation I proposed a fast & practical annotations process based on problem formulation I proposed multi-stage deep training pipeline that worked very well Designed and implemented the overall processing pipeline to be integrated with the backend team. Finished stable milestone of the project in short time.
Mar 2018-Aug 2018	Machine Learning Research Intern at D-WAVE, Canada Weakly Supervised Image Segmentation Project Research Project toward CVPR 2019 Keywords: Tensorflow, PASCAL VOC, COCO SUPERVISOR Arash Vahdat
May 2016-Aug 2016	Java Software Engineer Intern at GOOGLE, USA Worked in the photos team : investigating a feature for the photos app Designed, developed and tested the feature internally My Evaluation was very positive: very productive and needed minimal supervision Google offered another internship without interviewing process TEAM LEAD Jingyu Cui
Aug 2014-Apr 2016	C++ Senior Vision Engineer at HERUOLABS, Germany Worked remotely: full time for 5 months, then 40% part time during PhD Developed vision modules in detection, object proposals and tracking Developed tools to facilitate models training Developed a gateway to receive vision queries and process them Research investigations in some private ideas
Jul 2011-Jul 2014	C++ Software Engineer at NTP, Egypt Worked in a data storage management software named NTP QFS Team was maintaining Disk Quota Policies to limit user consumption Customizing the policies to meet the specific needs of your individual users Managing file data use across: the enterprise, multiple platforms, storage types
